Academy of Family Physicians of India

College of Family Medicine of India (CFMI)

FELLOWSHIP IN FAMILY MEDICINE (FFM)

PROSPECTUS 2026-2027

- FFM offered by AFPI through its academic wing CFMI
- A Comprehensives 1 - year blended program featuring 16 modules and 84 sessions.
- Designed for general practitioners to advance primary health care excellence
- Prestigious certification issued by AFPI in collaboration with a leading health institute.

ADMISSIONS OPEN:	ADMISSIONS DEADLINE:	COURSE COMMENCEMENT:
NOVEMBER 1, 2026	DECEMBER 31, 2026	FEBRUARY 1, 2027

MESSAGE FROM THE NATIONAL PRESIDENT

Dear Colleagues,

It gives me immense pleasure to present the Fellowship in Family Medicine (FFM), the flagship academic programme of the College of Family Medicine of India (CFMI), the academic arm of the Academy of Family Physicians of India (AFPI).

India's healthcare system is undergoing rapid transformation. While advances in technology and specialization have significantly enhanced healthcare delivery, they have also highlighted the growing need for physicians who can provide comprehensive, continuous, coordinated and compassionate care.

Family Medicine is the cornerstone of strong primary healthcare systems worldwide. It is uniquely positioned to address the growing burden of chronic diseases, ageing populations, mental health disorders, preventive healthcare and continuity of care.

The Fellowship in Family Medicine has been designed to bridge the gap between undergraduate medical education and the competencies required for modern primary care practice.

The programme combines evidence-based learning, clinical mentorship, practical skill development and community orientation to prepare physicians capable of delivering high-quality patient-centred care across diverse healthcare settings.

As the premier professional body representing Family Physicians in India, AFPI is committed to creating a new generation of competent Family Physicians who will strengthen India's healthcare system.

I invite you to join this exciting academic journey.

Col (Dr) Mohan Kubendra
National President
Academy of Family Physicians of India

MESSAGE FROM THE DEAN

Dear Doctors/Medical Practitioners

On behalf of the College of Family Medicine of India, an academic wing of the Academy of Family Physicians of India (AFPI), I am pleased to introduce one of the CFMI's prestigious professional programmes: the Fellowship in Family Medicine (FFM).
The College of Family Medicine of India (CFMI) seeks medical practitioners who value medical service as a noble profession and aim to make a meaningful impact on people and society. The Fellowship in Family Medicine (FFM) is a carefully designed, intensive, and rigorous academic programme that transforms medical professionals, taking them from mastering the fundamentals to achieving groundbreaking specialized distinction. Experienced Family Physicians and subject experts from across the country designed and developed the curriculum for this fellowship programme. It reflects the core principles of Family Medicine while incorporating recent advances in clinical medicine, digital health, evidence-based practice and competency-based medical education.

This fellowship programme offers personal and professional growth, exposure to world-class experts, access to cutting-edge technologies and digital resources, and the opportunity to join professional communities of practitioners and to build a lifelong network of distinguished researchers.

Our country has a vital need for a large number of robust and dedicated family physicians to safeguard the health and holistic well-being of our citizens. The FFM Fellowship enables general practitioners to enhance their Family Medicine skills. This initiative also strengthens the public-sector primary healthcare system. The FFM Fellowship supports the objectives of various Government of India programmes, including the universal health coverage policy, by promoting comprehensive primary healthcare.
The College of Family Medicine of India (CFMI) views family medicine fellows not merely as students or trainees, but as key associates and future leaders committed to solving real-world challenges in our country and advancing family medicine through impactful research and dedicated practice.

We wish you every success with your application.
Warm regards,

Prof. Dr. V. Sreenivas,
Dean, College of Family Medicine of India.

ABOUT THE COURSE

- The FFM is a comprehensive, structured, **one-year blended online training programme** for primary care doctors in India. It is offered by the **Academy of Family Physicians of India (AFPI)** through its academic wing the **College of Family Medicine of India (CFMI).**
- The programme incorporates distance learning components to facilitate the acquisition of **core knowledge and clinical skills.** Peer interaction, tutoring, and expert-led discussions are delivered through e-learning and direct-contact sessions.
- The Academy of Family Physicians of India (AFPI), a professional academic organization founded to promote family medicine and primary health care in India, has been relentlessly working to **unite medical professionals across the country to strengthen the quality of primary medical care** for people.
- The academy currently has a **membership base across India**, and its members include family medicine specialists, practicing family physicians, general practitioners, and medical officers, who provide quality primary medical care **across all age groups, genders, and organ systems.**
- The CFMI is dedicated to advancing family medicine in India through **education, training, and research**. It plays a vital role in improving the **quality of family medicine education and practice in India.**
- By offering fellowship programmes, promoting research, and advocating for better primary health care policies, **CFMI supports** family physicians in delivering **accessible, effective, and compassionate** care to individuals, families, and communities across the country.

VISION MISSION AND COURSE OBJECTIVES

- Family Medicine is an academic and scientific discipline with its own educational content, evidence base and clinical activity, and a clinical speciality oriented to primary care. Family physicians are specialists trained in the principles of family medicine. They are personal doctors, primarily responsible for providing **comprehensive and continuing care** to every individual seeking medical care, **irrespective of age, sex and illness**. They care for individuals in the context of their family, community, culture, and the planet's integrated health, **always respecting the patient's autonomy**.
- Primary health care is **essential to a strong health care system** and a healthy population, and family practice is essential to effective primary health care. Family physicians play a pivotal role in improving coverage and the quality of care. However, there are not enough family physicians in India, and the number of qualified family practitioners falls **well below the international standard of at least three family physicians per ten thousand. The FFM aims to address this gap by providing a convenient pathway for general physicians in our country to become family practitioners.** It is designed to provide comprehensive, continuous and appropriate health care to individuals and families. Many physicians are expressing interest in opening outpatient clinics that offer primary care, driven by increased public awareness of its importance. FFM appropriately satisfies these demands for physicians.
- This fellowship (FFM) provides an opportunity for the medical officers of the Health and Wellness Centres (HWCs) to **strengthen their skills in family medicine**, and, most importantly, at a larger level, it will strengthen the public-sector primary healthcare system, **as per the operational guidelines of Ayushman Bharat**. FFM paves the way for implementing the Government of India's health policy, which is committed to achieving **universal health coverage through comprehensive primary healthcare.**

FFM: FUTURE PROSPECTS

- **While you work**, do your Fellowship studies.
- **Update** your medical knowledge and **advance** your clinical expertise.
- Share experiences with doctors from all over the country.
- Enhance your career **prospects** and professional **credentials** in family medicine.
- Receive illustrative teaching in medicine through real or simulated cases. Case-based studies are not merely stories but critical components of evidence-based practice and lifelong learning in medicine. They will prepare doctors for the **varied demands of modern clinical work**.
- Develop **skills, knowledge and confidence** in managing medical emergencies in OP practice. Train the physician extensively and continuously in the art of outpatient medicine.
- Learn to manage chronic illness, often **coordinating care** provided by other subspecialists.
- Training is delivered by qualified family physicians who share **practical insights, diagnostic pearls** for various diseases and **advanced case approaches**.
- Develop **communication skills and patient counselling techniques** that enhance doctor-patient relationships.
- Provides a **comprehensive syllabus** prepared by qualified family physician experts.
- **Increased employability** in primary health care settings.
- **Accreditation** by reputed medical and educational institutions.
- Learn to provide **preventive care**, including routine check-ups, health risk assessments, immunization and personalized counselling on maintaining a healthy lifestyle.
- Learn to manage patients across **all age groups,** from paediatric to geriatric, ensuring **holistic, patient-centred care.** Learn about **digital health and telemedicine** in primary care.

UNIQUE FEATURES OF FFM COURSE

The Fellowship in Family Medicine (FFM) is a **premier training programme** designed to equip new-generation of doctors with practical skills, clinical knowledge, and modern tools necessary to excel in primary healthcare. Here is what makes our Fellowship programme truly unique:

- **Established by AFPI**: The CFMI-FFM Fellowship course is started by the Academy of family physicians of India (AFPI), the premier national organization dedicated to advancing primary care in India.
- **Taught by practicing professionals**: Our entire faculty comprises highly qualified, actively practicing family medicine specialists who understand the ground realities of general practice.
- **Elite hands-on mentorship:** Fellows gain unparalleled clinical exposure through exclusive clinical postings in the clinics of reputed family physicians.
- **Practice oriented curriculum**: The curriculum is heavily focused on the practical problems encountered in real life day-to-day clinical practice.
- **Pan-India perspective**: Learn from a diverse panel of faculty members hailing from across India, providing exposure to varied medical demographics and unique clinical insights.
- **Multidisciplinary expertise**: Core lecturers are enriched with vital insights from highly experienced adjunct faculty across various medical and surgical specialties.
- **Modern learning**: The course leverages the most up-to-date educational technology, ensuring a seamless, modern and flexible learning experience.

STUDY METHODS

- The training is delivered in a **blended format**, combining online learning (including self-directed study, instruction and discussion) with face-to-face clinical training (teaching and discussion).
- It is supported by **academic and supervisory faculty** who are experts in family medicine.
- The online component is delivered via Zoom and other advanced technology tools.
- Face-to-face training is conducted at study centres accredited by the College of Family Medicine of India.

CURRICULUM

The course carries 200 marks. The curriculum is organized into 16 modules covering 84 sessions over a ten-month period. It includes a dissertation/project work and the maintenance of a logbook documenting the presentation of 12 clinical cases.
The programme is delivered through a blended learning model that combines online and face-to-face teaching with intensive practicum training. The instructional methods include **didactic lectures, small-group discussions, case presentations, workshops, seminars, and self-directed learning.**
The learning resources and activities include study centres accredited by AFPI.

MODULE 1: PRINCIPLES OF FAMILY MEDICINE

1. Family physician and primary health care
2. Core values and principles of Family medicine
3. Patient centered care
4. Clinical problem solving
5. Preventive health care

PRACTICE OF FAMILY MEDICINE

MODULE 2: INFECTIOUS DISEASES

1. Tuberculosis diagnosis and management
2. Vector borne diseases-malaria and dengue
3. HIV/AIDS diagnosis and management
4. Hepatitis B
5. Urinary tract infection
6. Community acquired pneumonia
7. Adult immunization
8. Rational use of antibiotics

MODULE 3: CARDIOVASCULAR DISEASES

1. Hypertension diagnosis and management
2. Hypertension urgencies and emergencies
3. Dyslipidemia
4. Heart failure

MODULE 4: ENDOCRINOLOGY

1. Management of type 2 diabetes mellitus
2. Complications of diabetes mellitus
3. Diabetic foot
4. Thyroid disorders
5. Cushing syndrome

CFMI COLLEGE OF FAMILY MEDICINE OF INDIA
AFPI Academy of Family Physicians of India

MODULE 5: RESPIRATORY, NEUROLOGY AND OTHER SYSTEMS

1. Obstructive Airway Disease
2. Headache
3. Dizziness
4. Cancer screening
5. Lifestyle medicine
6. Rheumatoid arthritis
7. MASLD
8. Insomnia
9. Upper GI Bleed
10. Low backache

MODULE 6: GERIATRICS

1. Comprehensive geriatric assessment
2. Prevention of falls-clinical practice guidelines
3. Drug prescribing for older adults
4. Dementia and neuro psychiatric defects

MODULE 7: EMERGENCIES IN GENERAL PRACTICE

1. Medical emergency preparedness in OP practice
2. Cardiopulmonary resuscitation
3. Altered sensorium
4. Shock
5. Acute coronary syndrome
6. Stroke
7. General management of poisoning

CFMI
COLLEGE OF FAMILY MEDICINE OF INDIA
AFPI
Academy of Family Physicians of India

MODULE 8: SURGERY AND ORTHOPEDICS

1. Pain abdomen
2. Hemorrhoids
3. Osteoarthritis & Osteoporosis
4. Musculoskeletal Disorders

MODULE 9: PAEDIATRICS

1. Care of the newborn
2. Childhood immunization
3. Diarrheal diseases
4. Acute respiratory infections
5. Congenital heart diseases
6. Seizures
7. Child nutrition

MODULE 10: GYNAECOLOGY

1. Vaginal discharge
2. Menstrual irregularities
3. Contraception
4. Infertility
5. PCOS

MODULE 11: OBSTETRICS

1. Antenatal care
2. Anemia in pregnancy
3. PIH, Pre-eclampsia, eclampsia
4. Normal and abnormal labor
5. Gestational Diabetes Mellitus

MODULE 12: ENT

1. Epistaxis
2. Otitis media and externa
3. Sinusitis
4. Obstructive sleep apnea

MODULE 13: OPHTHALMOLOGY

1. Refractive errors
2. Red eye
3. Cataract
4. Glaucoma

MODULE 14: DERMATOLOGY

1. Eczema
2. Urticarial and other allergies
3. Skin and soft tissue infections
4. Fungal infections

CFMI
COLLEGE OF FAMILY MEDICINE OF INDIA
AFPI
Academy of Family Physicians of India

MODULE 15: PSYCHIATRY

1. Anxiety
2. Depression
3. Schizophrenia
4. Substance misuse

MODULE 16: DIGITAL HEALTH AND TELEMEDICINE

1. Digital health technologies: Platforms and tools.
2. Electronic health records and mobile health applications.
3. Health data management and analysis.
4. Data privacy and cyber security in healthcare settings.
5. Telehealth-specific regulations and laws in India.
6. AI in Primary care.

CONTACT CLASSES: PRACTICAL SKILLS & LEARNING MODULES

The face-to -face contact classes bridge the gap between online theory and real-world clinical practice. This comprehensive, hands-on training phase focuses on high yield clinical scenarios, diagnostic interpretation, and essential procedural skills required for Primary care.

CONTACT CLASSES-1:

Advanced simulation and procedural skills:

1. Airway & Resuscitation
2. Invasive interventions
3. Minor General Surgery
4. Wound care and debridement
5. Splints, POP Casts
6. ICU instrumentation

Clinical diagnostics and Imaging interpretation:

1. 12 Lead ECG Mastery
2. Pulmonary function tests (PFTs)
3. Chest X-ray reading
4. Rational lab evaluation etc.,

CONTACT CLASSES-2:

Chronic Disease management and Protocols:

1. Diabetes Mellitus and Hypertension master classes
2. Obstructive Airway diseases

Patient counselling and modern Practice:

1. Dietary counselling
2. Device Training
3. Digital Health workshop
4. Palliative Care: Core competencies
5. Health Advocacy workshop

Skills and Procedures:

1. Normal Labor, Assisted Vaginal Delivery, Pap smear, D&C, IUCD insertion
2. Fundus examination
3. Pleural tap, Ascitic tap, Lumbar puncture
4. Assessment and management of burns

Practicum Work:

This part of the curriculum has two components: a small-scale research project through visiting slums and collecting at least 6 family profiles, and visiting a 50-BED Hospital to study a minimum of 12 inpatient clinical cases, which shall be submitted as case sheets in the provided logbook.

ASSESSMENT AND EVALUATION

The one year online course should be structured into two semesters. Upon completion of the first semester a one-week Contact session will be held, concluding with a MCQ theory exam and logbook and family profiles eased viva case discussions. This forms the 'formative Assessment'

Of the 84 sessions, about two thirds of them will be delivered via **PPT based prerecorded video talks,** while the remaining will be delivered **via zoom webinar sessions** and some of them will be dealt in a **workshop.** The prerecorded videos, PPT presentations and the corresponding theory content material will be provided to the residents. Each of these talks includes two to three clinical cases in addition to the subject matter, to facilitate **interactive case-eased learning**. Furthermore the fellows are required to complete a **pre-assessment** before each session. The same questions are repeated at the conclusion of these classes as a **post-test** to assess accurately knowledge retention and learning outcomes.

Following completion of the second semester, another Contact session will be held, concluding with a subjective final short answer theory exam and an OSCE based practical examination, including logbook clinical cases and family profiles presentation for work review. This forms the summative **'final Assessment'**.

SCHEME OF EVALUATION

Credits or Marks will be finalized as per the accrediting body regulations Assessment Component	Description
1. Pre- and Post-Unit Assignments	Assignments submitted before and after each unit to assess continuous learning and understanding.
2. Attendance and Participation	Attendance at contact classes, including webinars, interactive sessions, and presentations.
3. Logbook	Maintenance of a logbook documenting the study and presentation of 12 inpatient clinical cases during visits to a 50–100 bed hospital.
4. Project Work	Community-based project involving visits to urban slums and preparation of at least six family profiles.
5. MCQ and Viva-Voce Examination	Multiple-choice questions to assess applied knowledge and a viva-voce examination to evaluate overall competence.
6. Final Theory and Practical Examination	Final assessment comprising a short-answer theory examination and an Objective Structured Clinical Examination (OSCE).

COLLEGE OF FAMILY MEDICINE OF INDIA
Academy of Family Physicians of India

Who should apply

- MBBS Doctors
- Medical Officers
- General Practitioners
- Primary Care Physicians
- Rural Practitioners
- Corporate Primary Care Doctors
- Doctors working in Health & Wellness Centres
- Physicians aspiring to establish Family Practice Clinics

Course Fees: 1,00,000 INR

Collaboration & Certification

- Prestigious certification will be issued by AFPI in collaboration with a leading health institute.

About Us

The Academy of Family Physicians of India (AFPI) is the national professional organisation dedicated to promoting Family Medicine and strengthening primary healthcare in India.

The College of Family Medicine of India (CFMI) is the academic wing of AFPI, with responsibility for structured professional learning and development in Family Medicine.

CFMI
COLLEGE OF FAMILY MEDICINE OF INDIA

AFPI
Academy of Family Physicians of India

Programme Outcomes

- Independently manage common primary-care conditions
- Coordinate multidisciplinary care
- Manage medical emergencies
- Provide geriatric care
- Deliver palliative care
- Practice patient-centred communication
- Utilize telemedicine
- Conduct community-based health assessment
- Lead quality improvement initiatives

Who Should Apply?

- MBBS Doctors
- Medical Officers
- General Practitioners
- Primary Care Physicians
- Rural Practitioners
- Doctors working in Health & Wellness Centers
